SUMMARY

Software Developer with over 5 years of experience specializing in modern web technologies and platforms, including React, TypeScript and CSS. Skilled in UI/UX design, animations, and enhancing customer experiences. At Browse AI, a high-growth, VC-backed AI SaaS startup, contributed to scaling ARR from $30k to nearly $2 million and attracting over 500,000 users. **Excellent communicator and team player with strong problem-solving abilities** and a passion for creating intuitive and engaging user interfaces.

SKILLS

React, TypeScript, JavaScript, CSS / SCSS / Sass, Next.js, Vanilla JS, Tailwind CSS, Bootstrap, Material UI, UI/UX Design, ThreeJS, Graphic design, REST APIs & GraphQL, Zustand, Vite, SQL, Angular, jQuery, Adobe creative suite, Figma, Webflow, Framer, Prismic, Wordpress, Git, TFS

EXPERIENCES

Frontend Developer, Browse AI, Vancouver, Canada   *March 2022- Present*

- Developed a library of UI components using **ReactJS**, **TypeScript**, **TailwindCSS**, and **Storybook**, customizing and extending components from libraries like **React Aria**, **Headless UI**, **Ant Design**, and **Tailwind UI** to meet specific project requirements.
- Initiated a **refactor** of our Robot Studio client app, utilizing **Zustand** for state management and implementing the **Shadow DOM**, eliminating duplicate code, and maximizing the reuse of existing components.
- Developed the front end of a custom authorization system similar to **Auth0** and migrated the codebase from **Create React App** to **Vite**.
- Utilize **advanced CSS techniques**, including **animations**, to create dynamic and engaging user interfaces.
- Integrated our dashboard with back-end services using **REST APIs** and **GraphQL**.
- Deployed **log monitoring** dashboards on **Datadog**, enhancing system reliability and performance tracking.
- **Collaborated** with **UI/UX** designers and participated in **design reviews** to translate design concepts into functional layouts, ensuring consistency between design intent and implementation.
- Conducted **A/B testing** to evaluate design variations and analyze user interactions.
- Collaborated with the **customer success** team to identify user pain points and enhance satisfaction and engagement.
- Built layouts and components using **Webflow** and **Prismic** for content management to align design and marketing specifications.

Frontend Developer, Kharazmi IT Development   *April 2019-March 2022*

- Developed and maintained a **PWA** for the bank's warehouse management using **Angular**.
- Led the implementation of Business Process Management Systems (**BPMS**) using **ProcessMaker**, where I utilized **pure JavaScript**, **jQuery**, and **Bootstrap** to build forms.
- Modified and implemented new features for the existing **user-tracking web app** using the **Leaflet** library.
- Build dynamic **animations** using **advanced CSS** and **JS** for different use cases, elevating user experience and testing **cross-browser compatibility**.
- Led the development and integration of our dashboard with external services using **REST APIs**.
- Created **UI designs**, **prototypes**, **wireframes**, and **mockups**. Evaluated **UI/UX designs** with other team members to ensure optimal technical implementation.
- Implemented **CRM** and **help desk** dashboards using **React.js** and **ASP.NET**.
- Programmed **Windows Form applications** with **Entity Framework** and **SQL Server** for the company's internal projects.
- Designed **database schemas** to store user data with **SQL Server**.

Frontend Developer Intern, Sklipper   *July 2014-December 2017*

- **Designed** and **developed** multiple web pages for various businesses on the **Linux** operating system with **HTML, CSS, JavaScript**, **Node.js**, and **MongoDB**, along with ensuring optimal **responsive design**.
- Created **game elements** and **animations** using **Illustrator** and **Photoshop** for an app called Persona
- Conducted **data analysis** and provided actionable recommendations while actively participating in **brainstorming sessions** and offering valuable input, driving new product development, strategic decision-making, and boosting team **creativity** and **innovation**.

EDUCATION

Bachelor of Arts

Software Engineering, Guilan University, February 2018
